## CHOLESTEROL, TRIGLYCERIDES, GLUCOSE POCKET MONITORS

- 23948 MULTICARE KIT - English/Spanish, manual
  - 23949 MULTICARE KIT - Italian manual
  - 23950 MULTICARE KIT + 10 glucose strips - English/Italian manual
- Unique diagnostic device for self-check of glucose, cholesterol and triglycerides. Multi-parameter technology allows to measure, with the same reflectometer, different parameters by simply changing type of strips: in fact, there is a chip in each pack of strips that is specific for each analyses. Regular measuring of these three parameters is important to prevent cardiovascular pathologies if we consider that intolerance to glucose, hyper-cholesterolemia and hyper-triglyceridemia are three of the main cardiovascular risk factors, along with the age, obesity, lifestyle, smoking and arterial hypertension (English, Italian). Multicare is supplied in 3 language carton box (English, Italian, Spanish) with a nylon bag, 10 glucose strips (23950 only), lancet device, 10 lancets, user manual (English, Italian, Spanish as above). Available on request French and Portuguese manual.

**23951 MULTICARE DISPLAY KIT**  
Includes display, multicare kit (23948), glucose strips (23955), cholesterol strips (23957), triglycerides strips (23959), 50 leaflets (English/Spanish).

## GIMA SKINFOLD CALIPERS: MECHANICAL AND DIGITAL

27320

- 27320 PLICOMETRO - Skinfold caliper - mechanical
- 27346 PLICOMETRO - Skinfold caliper - digital with PC cable for data transfer

This high precision instrument measures the thickness of a fold of skin with its underlying layer of fat giving physicians the situation of the subcutaneous tissues of the patient. Possibility of re-calibration

Produced to meet International Standards, the Gima "Skinfold caliper" has springs which exert a pressure of 10 g/mm<sup>2</sup> on the skinfold and an accurate scale which measures thickness in mm. With possibility of re-calibration of the pressure it solves the major problem of traditional skinfold caliper that is reduction of the tension of the spring in the time.

### Easy to use and read

With double reading scale (code 27320) or digital display (code 27346), it is supplied with picture showing advised positions for measurements. Tables will help to obtain correct % of bodyfat from measured data and make a correct evaluation of the patient.

### Stylish and user-friendly

A special nylon finish makes the device feel skin, avoiding trouble of contact with metal.

Made in metal and sold in an attractive wooden box.

Made in Italy.

User manual in English, French, Italian, Spanish.

### Data management on PC (only 27346)

Compatible with windows 2000 and XP, does not work with windows 98.

## BODY FAT ANALYZER WITH CARRYING CASE

### • 27322 GIMA BODY FAT ANALYZER

Ideal for dieticians, gymnasia and sports centres, it is perfect also for homecare. It will help manage nutrition, fitness and weight control and can indicate if you are at the right weight and also whether or not you are nutritionally healthy. Advanced technology in your hands.

GIMA Body Fat Analyzer measures the flow of electrical signals (total body electrical resistance or impedance) as they pass through FAT, LEAN (muscle, bones, vital organs) or WATER. When the amount of fat, lean or water changes, so does the Body Fat signal, giving you a highly reliable and accurate measure of the amount of each of these components that make up your total weight. Specifically, 4 electrodes are placed over metacarpus and metatarsus where a 50 kHz current is introduced. The detected signal level will be an index of total body water and fat free mass.

### Only 2 minutes for an essential and easy test

Testing and results take less than two minutes and have the same accuracy as other more expensive devices.

### A lot of meaningful data

**FAT:** actual weight of fat on the body

# ☐ THERAPEUTIC ANTIDECUBITUS MATTRESSES UP TO LEVEL III

Code 28501

Antidecubitus therapy system for prevention and therapy of decubitus ulcers for low risk patients (Norton classification)

• 28501 EURO BASIC ANTIDECUBITUS SYSTEM

Euro Basic is a 3 way alternating pressure therapy system suitable for low risk patients (Norton scale) with decubitus ulcers up to level II (NPUAP).

Euro Basic is supplied with an electric compressor and an overlay mattress with 17 individually interchangeable inflatable elements made of PVC-PU; the head elements remain static to improve patients' comfort.

The mattress can be easily connected to the compressor by the quick connectors and is quickly and safely fixed to the bed using the bed-straps with snap release buckles (supplied).

The Euro Basic compressor incorporates a pressure regulator so that the correct inflation pressure can be set according to the patient's weight. It is designed to support a maximum of 120 Kg.

The compressor has a visual alarm which indicates any system fault. The simple to operate CPR function ensures rapid deflation of the mattress for cardio pulmonary resuscitation. The mattress cover is breathable cover, waterproof and easily cleaned and can be machine washed up to 60°. System includes pump, overlay and cover.

## ANTI-DECUBITUS AIR MATTRESSES TO PREVENT SORES

- 28482 MASTER PUMP SYSTEM - with pressure adjustment
- 28483 KIT MASTER (AIR MATTRESS 28492 + MASTER PUMP 28482)

Made of stiff and strong ABS, it may be placed on the ground, as it has rubber feet, or hung at the edge of the bed. A control handle makes pressure regulation easier: air amount is adjustable to suit patient weight from 40 to 150 kg. The mattress should inflate totally in about 20 minutes. Air output 2.5 l/min. Master pump can be used with bubble or interchangeable section mattress.

Master pressure pump may be placed on the ground or hung at the edge of the bed.

## ANTI-DECUBITUS PVC WATER MATTRESS

- 28499 WATER MATTRESS

It is made in PVC with a stabilising inflatable external structure to prevent excessive water "wave motion" and of 3 independent units. The water mattress distributes the total pressure on the whole supporting surface, making this less than the average arterial pressure, avoiding the exposure of the skin to pressure risk. Easy to use, it is placed over the usual mattress and it is washable. It is sold with a manual pump, 2 disinfectants and an inflation tube.

Size: 190x85 cm. Weight 4 kg. PVC thickness 0,4 mm

- **28520 ANTIDECUBITUS GEL CUSHION 40x40x4 cm**  
Fluid gel grants a perfect distribution of patient's weight by sensibly decreasing the pressure on capillars and avoiding their eventual occlusion. It also gives a pleasant sense of freshness.
- **28522 VISCOELASTIC CUSHION with hole 40x40x3 cm**
- **28524 VISCOELASTIC CUSHION without hole 40x40x3 cm**  
It is composed by a Polyurethane gel layer with high pressure absorbing capacity and by a layer of Polyurethane expanded foam. The two layers are wrapped and protected by a special cover easily removable, with transparent sitting side and water-proof and anti-slip bottom side. Thanks to the Polyurethane gel the contact pressure decreases and improves the distribution of the same. Cover is made of polyamide threaded with PU,

MAGNETOMED is an ELF magnetotherapeutic unit designed for ambulatory or at patient home professional applications. It is useful in the therapies that require treatments repetition for a long period and/or long duration sessions, or therapies on traumatized or immobilized patient that have difficulty to reach a physiotherapeutic ambulatory.

**Applications**

The main effects of the ELF magnetic therapeutic fields are:  
 - antiaedemic, antalgic, antiflogistic, regenerative  
 Main field of application are: traumatology, rheumatology, angiology, neurology, dermatology, endocrinology.

**TECHNICAL SPECIFICATIONS**

Working frequencies: 2, 5, 10, 20, 30, 40, 50, 60 Hz.  
 Intensity control: 20, 40, 60, 80, 99%  
 Waveform: rectangular  
 Time of treatment: 1-99 min  
 Active channels: CH1 - CH2 - CH1+CH2

- 28321 GIMA MT BASE PLUS - magnetotherapy  
 Magneto Base Plus + is an ELF low frequency magnetotherapeutic unit designed for domiciliary applications.

The most important effects of the magnetic fields are:  
 Antiedemigen / Analgesic / Antiphlogistic / Regenerative and have applications in: traumatology, rheumatology, angiology, neurology, dermatology, endocrinology.

The magnetic field produced is impulsive.

The internal generator produces square waveform electrical current with frequency varying from 10 to 99 Hz and impulse time varying so to obtain a field's intensity determined from 10 to 80 Gauss.

Internal sound sensor of magnetic field and safety system in the case of short-circuit.

Two transducers can be connected at the same time (the field produced by each transducer is half of the total).
